

# INDEX TO VOL. VIII.

	Page
On reciprocal methods in the differential calculus. By <i>G. Boole</i>	1
On certain theorems in the calculus of operations. By <i>W. Spottiswoode</i>	25
On a physical property of the generators of the wave surface. By <i>W. Walton</i>	33
On the conditions of similarity of two surfaces of the second degree not similarly placed. By <i>Thomas Weddle</i>	35
Easy method of finding the moments of inertia of an ellipsoid about its principal axes. By the late <i>G. W. Hearn</i>	37
Theorems in Combinations. By <i>Rev. Thomas P. Kirkman</i>	38
On a class of ruled surfaces. By <i>Rev. George Salmon</i>	45
An account of some transformations of curves. By <i>Andrew S. Hart</i>	47
On the method of vanishing groups. By <i>James Cockle</i>	50
On a theorem concerning the combination of determinants. By <i>J. J. Sylvester</i>	60
Note on the calculus of forms. By <i>same.</i>	62
On the trigonometry of the parabola. By <i>Rev. J. Booth</i>	65
On electrodynamic induction. By <i>Riccardo Felici</i>	79
On the index symbol of homogeneous functions. By <i>R. Carmichael</i>	81
Solutions of two problems. By <i>Arthur Cohen</i>	92
Mathematical Note. By <i>Professor De Morgan</i>	93
Problems.	94
On the rationalization of certain algebraical equations. By <i>Arthur Cayley</i>	97
Note on the doctrine of impossibles. By <i>William Walton</i>	101
On certain geometrical theorems. By <i>W. Spottiswoode</i>	103
On certain geometrical relations between a surface of the second degree and a tetrahedron whose edges touch the surface. By <i>Thomas Weddle</i>	105
On a problem in Combinations. By <i>R. R. Anstice</i>	149
Elementary investigation of the formulæ for the variations of the integration and longitude of the line of nodes. By <i>R. Townsend</i>	154
On definite integrals suggested by the theory of heat. By <i>W. H. L. Russell</i>	157
Notes on molecular mechanics. By <i>Rev. Samuel Haughton</i>	159
Theorems in the calculus of operations. By <i>Robert Carmichael</i>	165

	Page
On the relation between a volume of the tetrahedron and the product of the <i>sixteen</i> algebraical values of its superficies. By <i>J. J. Sylvester</i> . . . . .	171
Solutions of Problems . . . . .	178
Problems . . . . .	187
On the third elliptic integral. By <i>F. W. Newman</i> . . . . .	190
On two new methods of defining curves of the second order, together with new properties of the same deducible therefrom. By <i>Professor Steiner</i> . . . . .	227
On the mechanical action of heat, and the specific heats of air. By <i>William Thomson</i> . . . . .	250
On the calculus of forms, otherwise the theory of invariants. By <i>J. J. Sylvester</i> . . . . .	256
Solutions of problems . . . . .	269
Note on preceding solution . . . . .	288

#### ERRATA.

Page 91, line 2,      for  $z = \frac{c}{2} \left( \frac{x}{a} + \frac{y}{b} \right) \phi_0 \left( e^{\frac{x}{a}}, e^{\frac{y}{b}} \right)$   
                              read  $z = \frac{c}{2} \left( \frac{x}{a} + \frac{y}{b} \right) + \phi_0 \left( e^{\frac{x}{a}}, e^{\frac{y}{b}} \right).$

Page 95, line 3 from bottom,  
                              for  $\left( \frac{V}{U} \right)^{k-1}$  read  $\left( \frac{V}{U+V} \right)^{k-1}.$
